Council Section 29/4/09
4 30/4

Circulated W H Nurse

For reasons given in this office Note dated 3rd December 1908, and according to the orders passed thereon by the late Dewan Mr Madhava Rao (slip A), the President of the City Municipal Council was requested to report if the piece of land marked A (in red ink in the tracing slip B) 75 feet from the Fort Wall and adjoining the "A" Electrical Station in the City, belonged to the Municipality or Government, also if there was any objection to make it over to the Department

With his letter of the 3rd instant (put up), the Municipal President forwards copy of a resolution of the Council stating that they are of opinion that the site in question to the Electrical Branch, as this plot of ground only open space left in the City limits, and creation of, and the idea of improving the locality itself. The

GPB—500—8 10 07

vacant ground in the interests of the public.

3 In the first place it was proposed in our letter to the President to en-close only the vacant space south of the "A" Station, fixing the boundary 75 feet from the Fort Wall, and not the vacant space on either side of the Station, as presumed by the Municipal Council. Secondly, it is for the pro-tection of the public and in their interests that this ground should be reserved, so that they might not have access to the high tension lines. Thirdly, in my opinion the interests of the Municipal Board should be sub-ordinated to the interest of the public themselves.

4 Government have already approved of the plot marked c c in plan being laid out as a small park with seats and trees planted as proposed by the Muni-cipal Board. But the small portion marked off in blue (D) adjoining the Station to the north should, I think, also be handed over to the Electrical Department as it is most necessary for the security of our lines as well as for the safety of the public that the latter should be entirely excluded from close proximity either to our Electric Station and the high tension and other

wires

wires in the vicinity.

5. It appears to me to be utterly useless to continue arguing with such an unreasonable body as the City Municipality, who seem to be utterly incapable of appreciating the fact that we are only acting in the in-terests and for the safety of the public, and also providing now for any future extension of the building, which will no doubt be required in the course of time; and I therefore send up the case for your orders.

6. It is doubtful, moreover, in my opinion, whether this piece of land is owned by the Municipality, but even if it does, it is absolutely neces-sary that the public should be ex-cluded from it, and I request that the orders of Government be given to the Municipality to hand the land over to the Electrical Branch, when I will have it fenced in.

7. I now submit the papers connected with the subject in view to Govern-ment in the Local Boards Branch ~~to~~ order the City Municipality to give up the land referred to without further question.

Secretary to the Government of Mysore, P.W.D.

The piece of land marked A and that marked D in blue (to the north of the Electric Station) may I think be handed over to the Electric Department. With regard to D sufficient space should be reserved at this busy corner for Municipal purposes — as the traffic at this point is very heavy. This detail may be settled in consultation with the Municipal President.

9 The dimensions of the sites proposed to be taken up are not given.

10 I think the case should be noted upon in the Municipal Section

Serial No 2 –

From the President, Bangalore city Municipal Council No 9817-7-09

Submits a tracing showing the particulars of open space that may be added on to the Transformer Station and submits the other particulars called for vide Sl No 1.

1 Plot A measures 1719 Sq yds and the President is willing to hand it over to the Electrical Dept with the exception of a strip measuring 10' × 119' on the Margin of the Fort Road; the precise extent of plot D as wanted by the Electrical Dept is not known but the Pres says there is no objection to grant a strip on to get measuring 130' × 20' or 266 Sq yds

2 On the other hand, he proposes that with a view to improve the Fort Road the wire fence in front of the Transformer Station may be shifted back by 10' as denoted by red dotted lines

2b The shifting of the wire fence back towards the Station will bring the latter to the road side and the P W D will probably object to the proposal as it would bring the public too near the high tension which they object to as

Bangalore City

To

The Secretary to the Government of
His Highness the Maharaja of Mysore,
General and Revenue Departments, Bangalore.

Sir,

ml 471-08
El-2

Ref:-Your docket No. 11121/Ml.(478-08)-1 dated the 8th May 1909 in re the grant of additional land applied for by the Chief Electrical Engineer to extend the compound of No."A" Transformer Station near the Fort.

- - - - - - - - - - :

I have the honour to submit herewith a tracing shewing the particulars of open space that may be added on to the Transformer House.

2. The land marked A in the tracing may be granted, reserving 75' of land from the Fort wall. As regards the land marked D, in the sketch received with the docket under reference, towards the North of the building, I beg to state that there is a cistern

on

on the plot which has connections with drains coming from various directions and it has to be cleared often - -especially during monsoons- to prevent clogging. I am of opinion that only 20' of space to the North, as marked in red dotted lines, may be given over to the Electrical Department.

3. The main building is built very close to the road, leaving only 10' of open space in front and this portion is further enclosed by wire-fencing.

This is an important road. I consider that a margin of at least 15' is necessary on either side of the same. There is a margin of 20' towards the East, whereas there is none on the Western side. As it is, it is not possible to expect a larger road margin in front of the Transformer Station. I would therefore propose, in order to improve the appearance of the road, that the existing wire fence in front of the Transformer Station may be shifted back as denoted by red dotted lines in the sketch prepared by the Municipal Engineer and submitted herewith.

4. The areas of the plots to be added on to the building are noted in the sketch and the tracing

received

received with the docket under reference is herewith returned.

I have the honour to be

Sir,

Your most obedient servant,

N Subba Rao

(2) Letter No 98 17-7-09 from the Secy, Bangalore City Munafi Council,

over

SUBJECT

submitting a tracing showing the
position ~~indicated~~ of the plots A and
B referred to above and stating that
there exists no objection to the marginally (1) Plot A. 119×130 ft or 1719 sq yds
noted extents (out of the above plots) being (2) Plot B. 20×130 ft or 289 "
given to the Electrical Dept but suggesting
that with a view to improve the appearance
of the road in front of the Transformer Station,
where traffic is very heavy, the existing
fence on that side may be put back by
10 feet as denoted by red dotted lines
on the tracing sent up by him.

Order thereon 7150-/mk 4-11-08- D 17.2.10

It is expedient to shift the existing
wire fence now running north to south in front of the Transformer Station
along the Fort Road. The compound of the
Transformer House may be extended
by an addition to it of 20×130 feet (Plot-B)
on the northern side and an addition
of 119×130 feet (Plot-A) on the southern side.
The existing wire fences on the east and
west will be produced so as to enclose
these additional areas. The new compound
will then be as the figure M-N.O.P. marked
